Think about things that have been in the news.

Have there been any big changes in the way technology is used recently?

Have there been any legislative disputes?

Have there been any public outcries?

Find a web page that shows a topical tech issue

Individual, Social,
Legal and Cultural Issues

Legends of Computer Science

Joy Buolamwini
1990 - present

Joy Buolamwini is a Canadian-American Computer Scientist who founded the Algorithmic Justice League, working to challenge bias in decision-making software and researching to highlight the social implications and harms of AI.

Dr Joy Buolamwini BSc, MSc, PhD

The responsibility of a software developer

Whenever we make new technology, we need to think about the range of opportunities and risks that it could lead to.

The responsibility of a software developer

Whenever we make new technology, we need to think about the range of opportunities and risks that it could lead to.

EG: Hery Rajaonaramampianina isn’t able to make accounts on many websites, despite being the president of Madagascar from 2014-2018.

The responsibility of a software developer

Whenever we make new technology, we need to think about the range of opportunities and risks that it could lead to.

EG: Hery Rajaonaramampianina isn’t able to make accounts on many websites, despite being the president of Madagascar from 2014-2018.

Chinese names are often a single character when typed with an appropriate keyboard. Often only two letters when using the Latin alphabet. Are those not valid first names?

Four areas we have to consider:

You will be asked to look at case studies and discuss:

- Moral issues

Four areas we have to consider:

You will be asked to look at case studies and discuss:

- Moral issues
- Ethical issues
- Legal issues
- Cultural issues

But what are these?

Discuss in your groups what you understand by these terms.

Discuss:

How do social media platforms protect your own values.

Think about settings you can change, or rules they have to abide by

Four areas we have to consider:

Moral issues

Four areas we have to consider:

Moral issues

- Individual sense of right/wrong
- Does technology protect the individuals?
- Are people free to express their opinions?

Four areas we have to consider:

Moral issues

- Individual sense of right/wrong
- Does technology protect the individuals?
- Are people free to express their opinions?

Ethical issues

Four areas we have to consider:

Moral issues

- Individual sense of right/wrong
- Does technology protect the individuals?
- Are people free to express their opinions?

Ethical issues

- Societies sense of right and wrong
- The shared moral ‘code’
- Is tech protecting society and its values?

Four areas we have to consider:

Moral issues

- Individual sense of right/wrong
- Does technology protect the individuals?
- Are people free to express their opinions?

Ethical issues

- Societies sense of right and wrong
- The shared moral ‘code’
- Is tech protecting society and its values?

It’s OK to be confused by these, but we need to make sure both are covered by our answers.

Recent news

Trump tweet:

“…These THUGS are dishonoring the memory of George Floyd, and I won’t let that happen. Just spoke to Govenor Tim Waltz and told him that the Military is with him all the way. Any difficulty and we will assume control, but when the looting starts, the shooting starts. Thank you!”

Apple fights $1.8 billion App Store lawsuit in first of UK class actions against tech giants.

Google Maps v Germany

In 1980s the German court recognised citizens' right to "informational self-determination"

Google Maps v Germany

In 1980s the German court recognised citizens' right to "informational self-determination"

In March 2010, the German Federal Constitutional Court overturned a law allowing authorities to store phone and email data for six months as a "grave intrusion" of personal privacy rights.

Google Maps v Germany

In 1980s the German court recognised citizens' right to "informational self-determination"

In March 2010, the German Federal Constitutional Court overturned a law allowing authorities to store phone and email data for six months as a "grave intrusion" of personal privacy rights.

In May 2010, Google announced it would be mapping Germany's 20 largest cities with street view. This was blocked by the government.

2025 Map

Four areas we have to consider:

Cultural issues

- Different groups may have different beliefs
- Is the technology sensitive to these differences?
- Are people being unfairly impacted by technological changes?

2. There are other laws and regulations about data.

Data Protection Act (UK), **GDPR (EU)**, **Freedom of Information Act (UK)**

- You must be able to see information stored about you.
- You must have the opportunity for **informed consent** to capture.
- You have the right to request the deletion of data.
- Data must be stored no longer than it is relevant.
- You have the right to update inaccurate data.

“Exam”ple question

Algorithms and artificial intelligence are being increasingly used to assist with the box diagnosis of medical conditions. For example, algorithms based on artificial intelligence can diagnose some medical conditions from X-ray images.

Discuss some of the moral, ethical, legal and cultural issues that might arise as a result of using computer systems to assist with diagnosing medical conditions.
